SECURITY FEATURES

In order to confirm the authenticity of a banknote, please check more than one security feature.

Intaglio Printing

Located at various positions on the front of the banknotes and can be felt with fingertips.

Latent Number

Concealed denomination numeral can be seen when the banknote is tilted horizontally at the

Holographic Stripe

The foil is made up of various motifs that are in harmony with the banknote's design. When looking at a banknote from various angles, these motifs display colourful and shiny reflections, "TL" letters in the rectangle change into the value.

Iridescent Stripe

Gives different colour effects, shifting into a golden yellow. The value and the letters "TL" can be seen when the banknote is tilted.

Security Thread

Embedded into the paper and bears the letters "TL" and the value of the note. When holding a banknote to the light, the thread can be seen from both sides as a continuous line.

Reproduces the small version of the Atatürk's portrait located on the front

of banknote and the value. It can be seen from both sides when held up to the light.
